CROSS PLOT STAKE

Length:
42cm - 10mm Cruciform | Cross 60: 60cm - 10mm Cruciform.

Composition: Polypropylene.

The rounded end allows rapid insertion of the peg. Four barbs ensure the label stays attached, even in windy conditions.

Fluorescent dyes give excellent visibility over longer distance but degrade faster.

MARKER & FITTING

The Shock signs fit in the pegs and can be easily inclined by a simple twist of their stem.

Our felt-tip pens are spirit erasable: your signs can be recycled several times.

Logitec 98 draws the labels for you, they can be laser-printed afterwards.

SHOCK MARKER STAKES

- 15x10 cm Yellow - 46317 - (per 250)

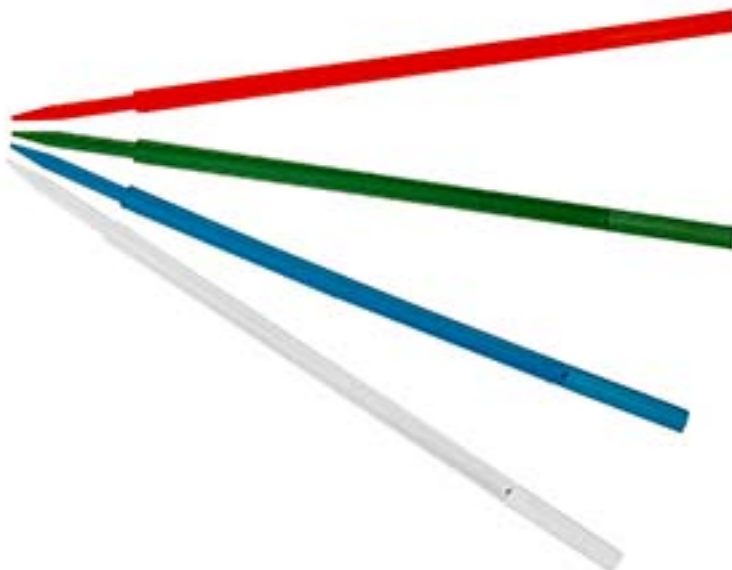

THREE IMPORTANT ELEMENTS

- You can choose the height of your pegs, thanks to the Shock pegs' ability to fit together;
- The plaque can be inclined at 45° and it is fitted on a double sided adhesive tape (DFR Ringot system);
- Various sizes are available for plaques and labels.

SHOCK UNIVERSAL

The free standing plaque system using Shock Marker.

These fit together to achieve the required height. 35 cm, 65 cm or 95 cm.

GLUTEC PLATES

Glutec Plates are sticky plates used in different crops to estimate populations of aphids likely to cause loss of yield or transmit viruses.

One of the principal uses is to assess populations of *Rhopalosiphum padi* responsible for the spread of BYDV in winter cereals.

This tool is complementary to any warnings issued by official or professional bodies. They are sticky both sides, protected by backing paper.

Available with or without supports.

FLORA INSECT TRAP

The Flora Insect Trapping system is used in oil seed rape, potatoes and sugar beet crops to monitor insect numbers.

The complete kit comprises of one 1.5 m x 10mm diameter Safi yellow stake, yellow bowl, adjustable bowl mounting clip so the bowl can be lifted as the crop grows, a foot rest that fits the stake so that it can be pressed into the ground with the foot avoiding the necessity of tools to setup the Flora Traps. Each bowl is equipped with water drain slots to prevent water from overflowing, these slots are small enough to prevent the loss of the insects.
